

THE GLEICHEN CALL

VOLUME XXXVII NO. 6

GLEICHEN, ALBERTA, WEDNESDAY APRIL 26, 1944

SUBSCRIPTION \$2.00 PER YEAR

Victory Loan Making Slow Progress

The first day of two of the Sixth Victory Loan drive in Gleichen was very slow indeed. The town and district quota for the loan is \$57,000, the same as the fifth loan. There is no doubt we will go over the top again. We want \$19,000 above the quota last time and surely we will do something like that again.

According to National War Finance Committee the opening day of Canada's 6th Victory Loan totaled \$74,276,150. The officials consider this figure very satisfactory as it is some \$6,000,000 ahead of sales reported on first day of the fifth Victory Loan.

TOWN COUNCILLORS HOLD MEETING COMMUNITY HALL

A special meeting of the town council was held in the Community Hall last week to which a number of business men were invited. The purpose of the meeting was to obtain the views of the business men in regard to the polling of the town. The government has decided that towns and incorporated villages maintain adequate police protection, which includes one or more men and lockup facilities. In a number of towns agreements have been entered into between the town and the C.M.P. force for the polling of the town by them. Reports from these localities indicate that the arrangement is entirely satisfactory and in some cases less expensive to the town and looks up with a nation-wide organization.

In the discussions the business men present expressed the opinion that as long as it was compulsory to maintain a police force in town, they were in favor of having the C. M. P. do it.

FROM THE FILES OF THE CALL TWENTY YEARS AGO

At a large gathering of golf players the following officers were elected for the season. President A. R. Yater; vice-president C. G. H. H. Yater; secretary A. R. Yater; executive committee Messrs. R. Clifford, Staback, Webster and T. H. Beach. The club decided to have a golf course of 18 holes on the Indian reserve about one mile from town and are delighted about the course.

Mr. and Mrs. Harry Brown have returned from spending the winter in Ontario.

L. M. Webster returned Monday from spending a couple of months in the east on business.

The re-opening of the stores last Saturday night made the town a quiet business like appearance.

Born to Mr. and Mrs. H. E. James, a daughter, April 16, 1924, at the Gleichen hospital.

Go. Dawson, wife and child left Sunday morning for Vancouver, with the intention of locating at some point in B.C. They were accompanied by Mr. and Mrs. Leadbetter.

Russell Matthews of Calgary was visitor to town over the weekend.

The announcement of a liquor vend for Gleichen is expected daily.

Caroline Plante was a visitor to his home from Brooks.

The work of cleaning up the old Bank of Commerce, which has been started and it is expected work on the new structure will soon be underway.

The contract for building the new Royal Bank building has been awarded to a Calgary firm.

Notes of the service. More than 2000 British army trained in Canada married Canadian girls.

The Canadian Women's Army Corps is making an appeal for 5,000 recruits.

With a staff of only 130 airmen, the section of the R.C.A.F. at the pair Depot at Soudou, N.B., in 1942 recovered 320 aircraft valued at \$50 million dollars, of which 228 were repaired and returned to service on Canadian soil.

FLT. LT. J. WALKER, D.F.C., KILLED WHILE ON ACTIVE SERVICE

Mrs. E. Walker has been officially informed that her son, FLT. Lt. James Walker, D.F.C., was killed in action. He was reported missing on February 8th of this year. The letter states he was piloting a transport plane with a crew of four when they were attacked by three Japanese planes and shot down. James and one other crew member were instantly killed by gunfire and the other three wounded.

FLT. Lt. Walker, D.F.C., received his public school education in Gleichen and later attended high school in Calgary where he trained for his civil pilot license. In January 1935, after he had received his private pilot license he joined the R.A.F. in England. This was about a year after his brother FLT. Lt. George Walker, D.F.C., joined the R.A.F. George has been a prisoner of war since June 1941. James fought through the heavy air battles during the evacuation of Dunkirk and in the Battle of Britain shot down seven enemy planes, and received the D.F.C. in November at Buckingham Palace.

In 1943 he became a Squadron Leader and was an instructor for Spitfire pilots in their final training. He did not like being grounded after almost four years of fighting and with more than 500 operational hours to his credit and in order to again take to the air he reverted to the rank of a Flight Lieutenant and is now in Italy. He was in a tough fight, the 22nd Gordon Yellorff got it and I never thought I would pull through my life. But I was in a lucky. Jerry has to get his medicine back as he gave I am here to tell you.

"And where are the others that had a call from them? They never realize that there is a job to be done. I wish they could see the people of England. Everybody is on some sort of war work. I have seen them doing it day and night. So little time to take their work at home, women and children, and I am just telling you these things because I saw them myself and I did not realize it until I came over here."

PUBLIC HEARINGS INTO BEER AND LIQUOR NEXT MONTH

Public hearings in connection with the investigation into the beer and liquor situation being conducted by a legislative committee consisting of Messrs. C. E. Gorman, Andy Davidson, M.L.A., and H. E. Dehbi, M.L.A., will be held in Edmonton, May 8, 9 and 10 and at Lethbridge, May 22, it is announced.

The committee is charged with the responsibility of investigating: 1-The regulations concerning the distribution of beer in the province; 2-The available supplies of liquor and beer in the province as compared with the demand; 3-The situation of the liquor trade with the practice now in force in this connection; 4-Such other matters relating to the sale and distribution of liquor and beer as the committee may deem advisable.

Organization meeting was held in Calgary, April 11, when the committee decided that persons and organizations wishing to make representations must submit six copies of their written briefs to the secretary of the committee ten days before the public hearing at which they wish to appear. This will give the members time to study the briefs.

As a legislative committee, the investigating body has power to summon witnesses for the purpose of the investigation. At the conclusion of their studies, the committee will submit a report to the Lieutenant-Governor-in-Council.

All correspondence and submissions should be made to H. D. Carrington, Secretary, Alberta Liquor Investigation Commission, Legislative Building, Edmonton.

BLOOD DONOR CLINIC IS VERY WELL ATTENDED

A most successful Blood Donor Clinic was held at the Blackfoot Indian Hospital last Thursday.

Mrs. D. Thomas in charge of the Red Cross Calgary Mobile Blood Donor Clinic, was very pleased with the nine donations of blood here and the kind assistance and co-operation of Dr. E. Windsor and C. G. Brown, and the staff of the hospital, and everyone who helped in any way.

72 cards were sent out to prospective donors, 64 responded. There were nine donations. 55 bloods were taken which was considered an excellent morning's work.

The Red Cross Society wishes to thank all who in any way helped during the day.

Geo. E. Bell Elected S.C. Candidate

(Strathmore Standard) At a meeting in Hiram's Theatre, Mr. G. E. Bell of Gleichen, was chosen Social Credit candidate to represent Gleichen constituency in the next provincial election.

In the evening there was a public meeting addressed by Mrs. Rose Wilkinson, member of the Calgary council and president of the Calgary constituency Mr. Fred Anderson, M.L.A. Mr. Bell of Gleichen, Mr. Maloney and Mr. Mueller.

Mrs. Wilkinson gave a very interesting account of the National Social Credit convention, which she recently attended in Toronto. She also spoke of the wonderful progress of the Social Credit movement in the western provinces.

Mr. Anderson stressed tolerance between political parties of Canada and said that Social Credit movement is steadily growing.

The chairman, Mrs. Herman of Cluny moved a vote of thanks to the speakers for their very interesting and instructive talks and the meeting adjourned.

PTE. MARK WOLF LEG WRITES FROM ITALY

Excerpts from two letters recently received from Mark Wolf Leg, the Indian agent, G. H. Gorderman. Mark was formerly a member of the 22nd Gordon Yellorff and is now in Italy. "I was in a tough fight, the 22nd Gordon Yellorff got it and I never thought I would pull through my life. But I was in a lucky. Jerry has to get his medicine back as he gave I am here to tell you.

BRACKEN CLUBS BEING ORGANIZED IN ALBERTA

Organization of the first Bracken Club in the province of Alberta took place at Calgary on April 21st. Arrangements are being made for the formation of another Bracken Club in Edmonton before the end of the present month. Originators in Winnipeg, the Bracken Clubs are a group of farmers, recruited from all parts of the province and citizens who have never had party affiliations, but who are interested in starting a friendly invasion of Alberta.

So popular was the first Bracken Club which sprang almost full grown from Winnipeg that requests for information about it came thick and fast from outside points in Manitoba, as well as from other provinces. Winnipeg appointed an extension committee which invited friends of the Bracken Club movement from all provinces to a series of meetings at which it was decided that the visitors should form themselves into a provincial extension committee to organize Bracken Clubs throughout the Dominion. At these meetings a lot of motions covering the objectives and methods of organization were drawn up.

From the beginning it was determined that Bracken Clubs were to be open to any good citizen, regardless of party, creed, race or color, and that they should foster better information about important national problems and bring influential action by the people to the furtherance of better government in Canada.

Since the original Bracken Club was founded, they have spread through the prairies on a wide scale and two Bracken Clubs are flourishing in the old City of Quebec. It is natural to assume that they will be equally popular in our own province.

This and That: Volunteer workers at six hundred local ration boards distributed 11,800,000 ration books. Savings deposits in our chartered banks touched a new all-time high at the end of last February when \$1,181,682,000 equaled \$1,708,460,000 more period year ago.

I KNOW EXACTLY WHAT DAD'S DREAMING ABOUT -- HE JUST GOT HIS VICTORY BONDS TODAY!

A COUNTRY EDITOR SEES Ottawa

WRITTEN SPECIALLY FOR THE WEEKLY NEWSPAPERS OF CANADA BY JIM GREENGLASS, Editor of THE SUN

Having dealt with the 6th Victory where farmers, as others, were appealed to for support, and at the same time benefit themselves by laying away a nest egg for the future, it is probably timely to give a brief resume of the recently released report Housing and Community Planning by the National Housing Act will come before parliament soon.

The committee recommends the building of 188,000 new farm homes over a twenty-year period at an estimated cost of \$250,000,000, 9,400 being built annually. The committee was moved, it is certain, by the important changes brought about by the war in farm population, which has been decreasing steadily.

Housing, it would appear, is considered a decent factor in getting people back into agriculture, particularly young people now in the armed forces, who will be making their first start in working life after the war. To get a proper perspective of the situation you must know that at the time of the first census of 1871, over 80 percent of Canada's population were farmers. By 1944 this had dropped to only 45 percent. Between August 31, 1939 and January 31, 1943, over 430,000 men and boys left their farms some into the forces, others into industry.

It is interesting to note too, a shift in farming is slowly taking place. During the '30's both Ontario and New Brunswick showed a marked decrease in their farm populations. New Brunswick and Saskatchewan reported 10 percent fewer farmers, while Prince Edward Island, Manitoba and British Columbia indicated 5 percent declines. Only in Quebec and Manitoba did the number of farmers increase, and by less than 10 percent. There have been further losses in the last three years.

Then take abandoned farm, rising in number from 32,800 in 1931 to 62,800 in 1941 (and, of course higher today) all reflecting the flight from the farm. Farm values over the same period decreased from an average of \$7,200 in 1931 to \$2,700 in 1941. The report makes no forecast as to future growth of Canadian farm population, but does visualize a great increase in mixed farming. The report makes no forecast as to future growth of Canadian farm population, but does visualize a great increase in mixed farming. The report makes no forecast as to future growth of Canadian farm population, but does visualize a great increase in mixed farming.

gram, plus the extension of rural facilities such as electrification, schools, etc.

There is a tremendous demand for engineers and science graduates for war industries and essential civilian services as shown by an analysis from the department of labour's wartime bureau of technical personnel, in January and February this year the bureau got more employee enquiries for technically trained persons than at any time since November, 1943. There are five vacancies for every three available, although \$1,000 persons so listed are now engaged in essential work. A large number of the 1944 engineering and science graduates have already been spoken for by Army, Navy and Air Force.

As an extension of the nation-wide check-up on all civilian men of military age subject to call-up in future all male applicants for unemployment insurance benefit will have to present proof they have complied with mobilization regulations. Birth or marriage certificate would be considered proof.

HAVE YOU ORDERED NEXT WINTER'S COAL YET?

If not, do it TODAY!

BY PLACING YOUR ORDER NOW...

You enable your dealer to deliver when he can and to make room for new supplies as they are mined.

You help to keep the mines producing... the miners working without halt time... the railroads moving the coal you need.

You insure your home against next winter's cold weather... You are more likely to get the sizes and grades you ask for.

Coal is Cold-Weather Insurance

Post-War Housing

PRIME MINISTER CHURCHILL, in a recent radio address, dwelt at some length on plans for post-war housing which are now being drawn up in Britain. The need for these plans is urgent, for it is estimated that in the first ten years after the war, 4,000,000 permanent new homes will be required there. Considerable study has been given to the subject and a number of reports have been submitted to the government. Emphasis has been placed on the necessity of giving careful consideration to problems relating to community development. It has also been recommended that a "master plan" be made for the proper use of Britain's land resources. Mr. Churchill has defined the most urgent needs of the country after the war as food, work and homes, putting housing among the most necessary post-war requirements. Bomb damage has destroyed many residential areas in the United Kingdom, and has greatly aggravated a shortage of living accommodation which had been evident even in times of peace.

Similar Need Is Felt Here

The housing situation in Britain, and the manner in which it is being handled, is of much interest to Canadians, for we have a similar problem which is now receiving considerable attention. While the housing requirements here do not reach the proportion reported in Britain, it is believed that from 600,000 to 1,000,000 new dwellings will be needed in the Dominion during the first ten years after the war. There will be no provision for the relief of overcrowded and slum areas, and for the demand for new homes in that interval. Housing authorities report that at the present time we have a shortage of about 300,000 dwellings. If all requirements were to be adequately met. A sub-committee of the Canadian Advisory Committee on Reconstruction has been studying problems of Housing and Community Planning, and their work has produced many interesting facts relating to this situation.

Special Study Of Farm Homes

The importance of town and community planning has been emphasized here, as it was in Britain. There have also been proposals in regard to simplifying the financing of new homes, or of repairs to dwellings now in use, both in urban and rural localities. Attention has been directed towards the housing situation in farming communities and it is estimated that 180,000 farm dwellings will require repairs and improvements, while there will be need for about 125,000 new farm homes, in the ten-year period following the war. For some time it has been felt that rural housing is a highly specialized study, and that efforts should be made to plan farm homes adapted to the needs of rural life. It is suggested that architects familiar with farm conditions departments of agriculture, and farm men and women should work on such plans for post-war improvements. These are only a few of the many aspects of Canada's housing problem, but they show the need for careful study and planning for the future.

Lucky Emblem

Lost Over Enemy Territory, But Germans Brought It Back Again. Harry Anquith, a Yorkshire blacksmith, made a silver-plated horseshoe for a Royal Air Force bomber crew some time ago.

The bomber was shot down over Germany, the horseshoe was salvaged from the wreckage and the Germans mounted it in one of their bombers. The German bomber was shot down over Southern England, and Anquith now has the horseshoe back again.

ONE GOOD REASON

Many people are grumbling at the difficulty of rationing butter under present allowances and one reason for the shortage is the fact that the Canadian Red Cross Society is shipping 100,000 pounds a week to prisoners of war. That sum should reconcile us to the need of spreading our butter just a little thinner on bread for the duration.

Price Control And Rationing Information

Q—I would like a correct list of the four new ration book numbers for the new ration book. A—One sheet of green tea or coffee coupons; Second—one sheet of pink sugar coupons; Third—one sheet of yellow preserves coupons; Fourth—one sheet of orange oil coupons; Fifth—four sheets of blue meat coupons; Sixth—one sheet of "H" coupons; Seventh—one sheet of "I" coupons. If your ration book has any of the above-listed sheets missing, or have too many, take the faulty books to your nearest Local Ration Board for correction.

Q—Will you please tell us whether or not the price of old wave permits are controlled?

A—The prices of old wave permits are controlled here. It is the official ruling on this matter. Operators do not charge more for a cold wave permit than they did for a hot wave permit. The price during the basic period, back in the fall of 1914, is this is an official ruling. It is the official ruling.

Q—My husband gave me a cloth coat trimmed with Persian lamb for my birthday last year. He tells me that the price of the coat is still the same. I've been doing a little window shopping, and find that the price of a coat is still the same. I've been doing a little window shopping, and find that the price of a coat is still the same. I've been doing a little window shopping, and find that the price of a coat is still the same.

A—Yes, there is on cloth coats, and they are still the same. This is because there is no selling on the part of the government. The prices of fur coats this year compared with last year.

Q—Can a tenant be asked to pay more for a house than he paid for it? A—Yes, when a tenant is more than fifteen days behind in his rent, he may be required to vacate under provincial law.

Please send your questions or your request for the pamphlet "Consumer's Guide to the Ration Book" (the book in which you keep track of your rationing) to the nearest war office in your province. Trade books are also available.

C.W.A.C. ITEMS

Corporal Frances Greig, daughter of Mrs. A. Abraham, Saskatoon, Sask. has been promoted from the rank of corporal in the Canadian Women's Army Corps. Cpl. Greig is employed as a typist in the Directorate of Military Training, Ottawa.

Sergeant Major Anne Strickland, daughter of Mr. and Mrs. W. Strickland, Calgary, Alta. has been promoted from the rank of sergeant in the Canadian Women's Army Corps. Sgt. Strickland is in charge of a platoon at No. 45 C.W.A.C. Administrative Unit, Ottawa.

Sergeant Ada Greenberg, daughter of Mrs. Bertha Greenberg, Winnipeg, Man. has been promoted from the rank of corporal in the Canadian Women's Army Corps. Sgt. Greenberg is doing clerical work in the Directorate of Ordnance Services (Administration) Ottawa.

Sergeant Jean Weir of Edmonton, Alta. has been promoted from the rank of corporal in the Canadian Women's Army Corps. Sgt. Weir was recently transferred from Calgary, Alta. to Ottawa, where she is working for the Directorate Reserve Army.

Corporal Marion Wilson, daughter of Mrs. Sarah Wilson, Arcola, Sask. has been promoted from the rank of private in the Canadian Women's Army Corps. Cpl. Wilson is a stenographer in the Directorate of General Medical Services, Ottawa.

From Northern Rhodesia Copper, used for wire in driving bands for shells and (as brass) in cartridge cases. It is the largest producer of copper in the British Empire. Some of the labour is supplied by African women volunteers and production goes on for 24 hours a day.

IN MERCANTILE MARINE Over 40,000 Indian seamen are engaged in the British Mercantile Marine, serving in all parts of the world. They account for about a quarter of the men who man the Merchant Navy.

Price Control

What Women Have To Say About Keeping Down Inflation

(By Edna Jacques)
On the farm, in the city home and all the way to Parliament Hill in Ottawa, women have one opinion about price control. Remembering what the last war did to the household budget, they are thankful for the price control. And they know it is their responsibility to check prices of everything they buy, and keep food at a level where they can be satisfied or enough "to keep the kids growing," as one of them put it—and set a good table.

Here some of the things women have said about price control: "Price control and price ceilings have saved the country. There have been a few mistakes, naturally, but on the whole, price control has been our salvation"—Mrs. Cameron Dow, President of the Polarized Women's Institutes of Canada.

"But for price control they would be desperate. Hundreds of my people live on fixed incomes, old age pensions, pensions for the blind, etc., and if prices were to rise, the plight of people like these (and they are legion) would become desperate in the extreme"—Thelma Williams, executive secretary of the Ottawa Welfare Bureau.

"Every organized group leader in Ottawa is doing his best to help the organization the vital problem of price control. The fight against inflation and uncontrolled prices must be waged in every kitchen in the country"—Mrs. John Detwiler, of London, Ont., national education officer I.O.D.E.

"Housewives who remember the years of the last war will undoubtedly agree that the present system of rationing has been of tremendous advantage. I recall distinctly the days of the last war when butter was at 75 cents a pound in the neighborhood of \$7.00 a bag"—Senator Clarence R. Wilson.

"Price control in Canada has certainly been a boon to this country and saved the inflationary prices with which the United States has had to contend," says George Black, of the Yukon.

"And the little woman at a church meeting summed it all up without a trace of irony when she said: 'We are not asked to push on and storm a beachhead, or build a bridge under enemy fire, we are asked to hold the line against inflation—our battle ground is right smack in our own kitchens, that's our job, ladies!'"

Plastic Paint

Another Important Discovery Which Has Resulted From War Research

When is paint not paint, that is the question? And the answer is, when it's plastic! Such a product has just been perfected for painting ship's bottoms. The result is a cleaner hull, and a cleaner hull means less drag on the engine, more speed, and less time in dry dock. No mention a saving in fuel.

Plastic paint is one of these wartime discoveries which resulted from pre-war research.

GEMS OF THOUGHT

RENEWAL
Fellow and change we need, nor constant toll.
Not always the same crop on the same soil.—W. W. Rorty.

Today is not yesterday: we ourselves change; how can our Works and Thoughts, if they are always to be the fittest, continue the same?—Carlyle.

To re-create cheerfulness, hope in God or change the object of attention to more elevated and worthy of thought.—C. Simmons.

Lord, what a change within us one short hour.
Spent in Thy presence will avail to make!

What heavy burden from our bosoms take!
What parched grounds refresh with a shower!

—Richard C. Trench.
Inspired thought relinquishes material sensual, and makes the spiritual and immortal—Mary Baker Eddy.

Be not conformed to this world, but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God.—Romans 12:2.

Danger From Moths

How To Protect Clothes During Summer Storage

The problem of protecting winter clothing from moths during summer storage entails more care than when summer clothing is put away for the winter, because in warm weather moths are more numerous. At the same time, insects may be quite active in winter in heated buildings. There are two main points to be observed in the protection of household articles subject to damage by moths. The articles must be stored, either in thoroughly clean, and the receptacle in which they are placed should have the slightest hole or crack through which a moth might enter. If there be such a means of entrance, the trunk, box, drawer, bag or whatever receptacle is used, is not moth proof.

Washable articles before being stored away should be washed. Clothing, blankets and such-like articles, should be thoroughly brushed. Preferably, where possible, they should be sent to the dry cleaner before being placed in storage. To reduce the chance of infestation, moth balls or other repellent may be used. In trunks or boxes they may be scattered about, but a much tidier way is to obtain pin-up medallion repellents which may be bought in cupboards, and on the inside of the lids of trunks and boxes. The fumes from these chemicals are deadly to insects, and being heavier than air they penetrate to the bottom of the receptacle. Particularly in the case it is easy to suspend the repellent near the top of the bag above the hanger, and away from the clothes.

Where naphthalene flakes can be obtained, an effective method is to enclose an ounce or two in a home-made cheese cloth bag and suspend it from the top. Both balls may be used in the same way. Plans fitting may be guarded by suspending the repellent in a cheese cloth bag inside the piano, and keeping the piano closed when not in use. Further information about the protection of articles in the home may be found in Publication 687 (Circular 187) "Control of Some Common Pests of Household Interiors," available free by writing to Dominion Department of Agriculture, Ottawa.

A WORLD RECORD
The Mosquito is the only first-line aircraft which had not been destroyed before the war started. Its production represents a world record from drawing board to operation: it was in action against the enemy only 12 months after it had been designed.

The term "skyscraper" was originally applied to a skyscraper of triangular form.

Equal To Job

Two Women Welders Astonished Foreman Of Construction Firm

Two girls (who modestly wish to be unnamed) started the workers and officials of a local construction firm by their unorthodox knowledge. It happened this way:

The two nameless girls learned at Toronto Shipyards, and so enthusiastic were they in their work that they learned many things about shipbuilding from mechanics and fellow workers. When a big construction firm was contracted with the problem of bending a bow shell plate and had no mechanic to do the job, an S.O.S. went out to the Toronto Shipyards. There was no, however, a plate shop man who could be spared, but one of the plate-makers did "know a couple of hands that might take an hour off and show 'em." He named the girls, who admitted they had picked up considerable knowledge of plate shop work. They were despatched forthwith to the big construction firm. They were met by a startled foreman. They did bend the required plates themselves, and it was an A1 job—Toronto Telegram.

Stop Dosing Constipation

There Is A Better Way To Correct A Common Cause

Yes, you can free yourself from slavery to the common cause of constipation, its lack of lasting relief if your trouble is due to insufficient "bulk" in the stool. Do so by thousands of others have done! Try the gentle-acting, ALL-BRAN with KELLOGG'S ALL-BRAN really "gets off" this common cause of constipation by supplying the missing "bulk-producing" material needed for "bulk-producing" material needed for a daily serving of ALL-BRAN, or several ALL-BRAN muffins. Drink plenty of water. Get ALL-BRAN at your grocer's, a convenient place. Made by Kellogg's in London, Canada.

Peacetime Plans

Furniture Factories Expect To Be Kept Busy After The War

The furniture industry, believing itself one of the industries which can most readily be converted to peacetime production, is conducting a nationwide survey to assess volume of workers it can absorb in the immediate post-war period. The industry of furniture at the end of the war is expected to cause a sharp increase in the number of men now employed in factories and retail outlets.

The burning of coal was prohibited in London in 1806 because of the smoke it produced.

Notice of Preparation of Assessment Roll

TOWN OF GLEICHEN ASSESSMENT ROLL 1944

Notice is hereby given that the assessment roll of the Town of Gleichen for the year 1944 has been prepared and is now open for inspection at the office of the secretary-treasurer of the Town from ten o'clock in the forenoon to three o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until noon and that any person who objects to the entry of his name or that of any person upon the said roll, or to the assessment of any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer.

Dated this 12th day of April 1944.

WITH THE WEEKLY NEWSPAPER MEN OVERSEAS

THE WHITE CLIFFS OF DOVER

(By C. J. Allison, Jr.)

There was a day we were taken to Dover, which is the nearest point on the east coast to France. I had seen Dover back in the days of the first World War, for Dover with its high white cliffs is one of the sights of Britain. In the days before the war travellers visited Dover from all parts of the world and revelled in the scene of its cliffs towering white and big far above the level of the sea. Today, Dover is a fortress. Its guns command the channel and the enemy ships which succeed in running the channel—if they do succeed—are fortunate indeed.

The name of Dover will bring back to the minds of our readers the time when the Scharnhorst ran the gauntlet successfully. People wondered that such a thing could happen right under the nose of our guns. In those days, however, Dover did not conceal the weapon power with which it has been reinforced today. Even at that time, however, the Dover guns made things a bit unpleasant for the daring German raider, and out of the shots fired at the battleship three were known to have found their mark. The damage inflicted was sufficient to prevent the Scharnhorst from putting to sea at that time. Today the enemy does not possess any ships that could hope to run the gauntlet of the channel. One freighter captain who dared to attempt it only a few months ago went down with his ship and the water is still sticking up out of the mast to prove the marksmanship of the Dover guns. As we toured the Dover area we were particularly impressed with the control room from which point the fire of the guns is directed with the aid of all the latest instruments. To visitors like ourselves the picture of this control room will forever remain impressed on our minds and here the mysteries of long range shooting were unravelled before our eyes. This alone made the trip to Dover worth while.

We lunched at noon in a little restaurant next door to a small pub where most of the party enjoyed a glass of ale before they set down to one of the best meals we had run into up to that time. The food was well flavoured and well cooked. While most of the boys were enjoying their ale two of us found ourselves discussing with some of the workmen the gun power that protects the English coast at this point. We found that the barrels of these huge guns were being renewed and workmen from a big factory were busy making the change over which took some weeks and was then just about completed.

The working quarters of those who defend Dover are built into the cliffs and long tunnels connect the various rooms which are well ventilated. Here and there the tunnels lead out to the face of the cliff from which vantage point an observer, on a clear day, may see the coast of France. Indeed they can hear the explosion of the big guns which from time to time shell that area. They know just when to duck—and it never pays to be late. Dover is one of the points from which speed launches are sent to the channel under the direction of the

Royal Air Force when raids are on, to assist in receiving those who come down in the channel. Torpedo boats are also stationed here and it was the privilege of our party to take a run in the channel in both types of boats. The channel is usually choppy but these boats made particularly good time as we dashed heading for the French coast for a couple of miles—and then turned back to Dover in case the Huns might think we were leading, the long looked for attack and star shooting.

The town of Dover has suffered considerably both from the long range guns on the coast of France and from enemy bombers but life goes on much as usual. Even the sound of gunfire doesn't seem to disturb the citizens of Dover—not as much as it did our members, who as they reached the defences, were greeted with an early morning battery practice. At that moment we did not know but what the enemy were taking a pot shot at the inquisitive reporters and no doubt deep in their hearts there were some of our party who were quite ready at that moment to leave the story of Dover unwritten. On our way to Dover we passed through Folkestone, so familiar to

thousands of Canadians. It was just outside of Folkestone where our regiment was billeted when we landed in England during the last war. Folkestone was a summer resort in those days and thousands of Londoners spent their holidays there. From the station we could not see that the town suffered much damage, but it did look to be much larger than when we knew it—but perhaps we were not paying so much attention to the town in those days as to the people we found there.

Apple sauce, beets and carrots, and beans with or without pork or tomato sauce have been added to the list of fruits and vegetables which may be packed in tins. Additional sizes of cans have been provided for a number of products, and packing quotas have been increased in some instances. The new order is designed to provide for a minimum pack in 1944, and allows for some reconversion to metal containers since the glass, wooden and fibre container industries are unable to meet current demand.

This is the Job We Have to Do

THIS COMMUNITY MUST BUY \$57,000 Victory Bonds

That is our share of the one billion, two hundred million dollars (\$1,200,000,000) objective set for the Sixth Victory Loan.

We Must Do Our Share

It's a big job. We've done big jobs before. We've put five Victory Loans over the top up to now. But just because we've put five loans over the top is no reason why we can be indifferent about this loan. We must not assume that the job will be an easy one. We must realize that it's a big job—and assume that it will be a hard job—and make sure that the job will be done; then it will be done.

ALL MUST BUY BONDS

and all of us must buy ALL THE BONDS WE CAN

It must be plain to all of us that the opening of new battle fronts means a more costly war. More equipment will go into action. Losses will be heavy. Replacements must go through without let-up. Our men on the fighting fronts must have everything they need.

There's no let-up on the fighting fronts. There must be no let-up on the home front. We've got to raise the money. Every Canadian must save and lend. Most of us are earning more. We can save more. Others are risking their lives, surely we can lend our money.

Buy Bonds With Savings BUY MORE OUT OF INCOME

DURING THE NEXT 6 MONTHS

Most of us have some money which we have saved. We can buy Victory Bonds with this money . . . and we can buy more bonds on convenient Deferred Payments, paying for the bonds as we earn the money, over a period of six months.

Fulfill your obligations to the men who are fighting.

Put Victory First BUY VICTORY BONDS

OUR COMPLETE SHORT STORY—

Love And War

By SETMOUR RICHIN

McClure Newspaper Syndicate

George was almost on his knees pleading with Eddie. There was a wild look in George's blue eyes. The lion roared twice, the saying goes, but the third time he fights. George was a lion, but he'd been refused fifteen times. Repetition does things to a man as well as to a lion.

Now, shouting at Eddie, George's hair was disheveled, his collar was open and long since wilted, and his size 13½ neck was raspery red. "Eddie," he screamed, "you've got to help me. I'm a ruined man if I don't go to the big dance tonight. Judy'll never forgive me. She'll treat me like ice, hot ice. I've got to have your tuxedo, Eddie. The other fellows are either going themselves, or are too fat or skinny or tall or short to rent one. I've got just enough dough for the dance and the trimmings."

"Is that so?" Eddie questioned politely. "Most trunks."

"Eddie," George said hoarsely, collapsing on a chair, "you'll lend me your tux, won't you? You wouldn't leave a pal on a sidewalk, would you? Would you, Eddie?"

"Ah, of course you know, George," Eddie finally stated. "I like Judy myself. And seeing you in such a position does not, you understand, bring tears to my eyes."

George's voice was very faint. "Yeah, I know, Eddie. But don't you ever think of suffering humanity? Don't you ever . . ."

"No, I never," Eddie interrupted curtly. "But I know when I'm kicked."

"You do," George managed, a delicious grin on his face.

"Yeah," Eddie said with a peculiar smile. "Judy likes you; O.K. by me. I'm a sport. After all, the best man

wins and Judy has given you the decision."

George gaped at Eddie, flabbergasted. "Then the war's over!"

Eddie nodded. "Yeah, Over. Truce. Armistice. Peace and what have you. I retire from the field of battle. You win and I lose."

"Then you'll lend me your tuxedo?"

"Of course, George, Of course. I'd lend you my ears if you wanted them, George. But I shall continue to lend you Judy. Privately, though, to be sure."

"Eddie," George said solemnly, slapping him on the back, "you're a real pal. A staunch, stalwart pal. A man that would give his heart's blood for a friend."

"Eddie, I, George, Save it for my birthday. My tuxedo is at that cost. Put it on gently. It cost me good American cash."

"Thanks, Eddie," George yelled, as he dove for the closet. "Thanks!" he shouted, running for the door. "I'll never forget this."

"No," Eddie murmured as George bolted out of the room, "you never will. I'm going to see to that myself." A few minutes later Eddie reached for the phone. He dialed swiftly, a contented smile on his face.

"Hello," he purred smoothly. "Park Central Valt Shop? This is Eddie Weller. I rented a tuxedo from you two weeks ago. Yeah, of course I know it's not paid for! Don't get excited, miss, you'll defend me. There's nothing worse than a woman who shrieks. You'll get your money. A friend of mine is wearing the tux tonight at the school dance. Get this. His name is George Winthrop. He's agreed to pay for it. Send someone over to collect. Eddie put down the phone, his wide smile threatening to reach his ears. He had, he muttered, "you're so stupid it's a crime to beat you."

Eddie undressed and went to bed. Eight days down the hallway George was struggling frantically with the door. On his dresser he had two dollars and change—just enough for a movie after the dance.

It seemed to Eddie as he got up the next morning, that the sun was shining brighter than ever before. The sky was never bluer—he had never felt better. All in all, a very auspicious awakening. Eddie hummed as he washed, thinking of Judy. He as he dressed, thinking of a woman he whistled as he went out to breakfast, still thinking of Judy.

George's door was at the head of the stairs. Eddie knocked in passing and was astonished to hear a jovial, "Come in!" Eddie stopped whistling. He pushed the door open and entered. George was sitting on the end of his bed pulling on his socks. "Good morning," Eddie, he greeted. "How's the boy?"

Eddie stared wondering at the smiling George. "Did you have a nice time last night?" he asked after taking a deep breath.

"Yep," George replied, beaming. "And you can be the first to congratulate me, Eddie. Judy and I are engaged."

Eddie gaped. "You didn't go to the dance last night?" George continued. "Judy's name was taken sick and she had to go home. So the dance was off. And, Eddie, it was all so funny. When I went in Judy kissed me right away. It was much better than any dance." George rubbed his eyes.

"What's your tux?" Eddie asked weekly.

"At Judy's uncle's," George replied. "The Park Central Valt Shop, you know, where you rent it. Judy said she got your phone call. And that's what I'm wondering about. Why'd you want to call the Park Central, Eddie?"

George's voice was very faint. "Yeah, I know, Eddie. But don't you ever think of suffering humanity? Don't you ever . . ."

"No, I never," Eddie interrupted curtly. "But I know when I'm kicked."

"You do," George managed, a delicious grin on his face.

"Yeah," Eddie said with a peculiar smile. "Judy likes you; O.K. by me. I'm a sport. After all, the best man

Wooden Wonder

Mosquito Plane Flies Higher And Faster Than Any Other Bomber In The World

They call the Mosquito plane "The Wooden Wonder" and there is nothing derogatory about it. She is the No. 1 pin-up girl of the aviation world.

Her evolution goes back to Dec. 28, 1939 when men with vision laid down plans for construction of a wooden aircraft. The plane had neither gun turret nor gunners for protection.

May 15, 1941, saw the first flight of the Mosquito. It was a triumph. On Sept. 25, 1942, when Mosquitoes carried out a daring attack on Gestapo headquarters at Oslo. She made the first raid on Berlin. On May 19, 1943, she saw the fighter-bomber carrying 2,000-pound bomb loads with full fighter armament of four cannon and four machine-guns. The unarmed bomber version carried 3,000 pounds of bombs.

Jan. 30, 1943, Mosquitoes went to Berlin and spotted Nazi party birthday celebrations. In March that year Mosquitoes appeared as a day fighter, ranging deep into France and covering the Bay of Biscay.

The night of Feb. 23-24, 1944, they really bombed her up. On the morning of the 24th they announced the "Mosks" had carried 4,000-pound bombloads into Germany. On the morning of the 24th they announced the "Mosks" had carried 4,000-pound bombloads into Germany. On the morning of the 24th they announced the "Mosks" had carried 4,000-pound bombloads into Germany.

There is nothing so far to touch her because today this small town fighter is flying higher and faster than any other bomber in the world—something far in excess of 400 miles an hour.

Story From Northland

Dentist Found One Patient Who Had Used His Ingenuity

Leut. George A. Benstock, dental officer in central Canada, was in the United States army, has met some old patients during duty tours in the northland.

He found a trapper who wore two wolves' teeth, fitted into a bridge with glue, and that Eskimos have a mortal fear of dental chairs. A grizzled trapper mused 300 miles by dog team to "see the dentist."

"He had a bridge for two front teeth, made years ago," said Leut. Benstock. "The teeth, however, had fallen out and the trapper had taken two wolves' teeth, filed them, and fitted them into the bridge with glue."

They were serviceable for a time, but the dentist held out for a time. The American officer, whose home is at Lunderhurst, Long Island, N.Y., treated many Indians and Eskimos in the north.

"Getting the Eskimos into the dental chair was the worst," he sometimes they put up stiff resistance.

STRONGLY CONSTRUCTED

Dotting the West African landscape are the hollow nests of termites—or white ants. Often their nests are 10 feet high, and are constructed of earth and wood cemented with saliva and strong enough to hold a man.

GARDEN NOTES

Cultivation

Killing weeds is only one function of cultivation. In the well-cared-for garden, there weeds are kept from doing much harm. Weeds are kept from doing much harm. Weeds are kept from doing much harm.

Flowers and vegetables divide themselves into three general groups—hardy, semi-hardy and tender. In the seed catalogues and on the packets these are the general divisions used, and this information provides the key to planning time in any part of the Dominion.

The first group can be put in just soon as the soil is fit to work, which is when it crumbles and is warm. These are the general divisions used, and this information provides the key to planning time in any part of the Dominion.

The most effective layout of flowers, lawns and shrubbery, for the average gardener, is an informal one. This, curved paths and borders rather than straight ones. But when we put in these curves, especially in paths, lawns and borders, we must be sure to make a reason for them otherwise the whole effect will be artificial. At the best, the driveway or path, therefore, it is well to have it of the group of shrubs or a flower bed.

SMILE AWHILE

"There's only one way to get rid of your surplus fat. Exercise, and plenty of it."

"Nonsense. How do you account for my wife's double chin?"

"I called to make an appointment with the dentist."

"He's out just now."

"Ah, when do you expect him to be out again?"

She: "Why have you brought me artificial flowers?"

He: "We don't use ones usually die. I'm waiting for you."

A lawyer, being interrupted said: "I will speak, sir, as long as I please."

"You have spoken longer than my wife's double chin."

"That was the opponent's retort."

Sherrif: "Did you catch that automobile thief?"

Deputy: "He surely was a lucky fellow. We had chased him a mile when our 1,000 miles were up and we had to stop and change oil."

Magde: "Don't you sailors have a ship where you get your hair cut?"

Sailor: "No, there ain't no such ships in our fleet."

Magde: "Then what are these copper ships I've heard so much about?"

Magistrate's Clerk: "Why haven't you paid this man's bill?"

Man: "When I had the money to pay, my wife wanted a new hat."

Clerk: "And you gave her the money for the new hat?"

Man: "Yes, I thought you would be more lenient than she would be if I refused."

"I hear you are giving up your pastures," said an aged and in-form minister to another. "How are your people taking it?"

"Oh, well," was the answer. "I'm resigning, and they're resigned."

Walter (at the club): "There is a lady outside who says that her husband promised to be home early tonight."

Al (rising): "Excuse me a moment."

Boss, near the Persian Gulf, is continuing to have the longest continuous existence of any city in history—from 4,000 B.C. to 650 A.D.

These days, when tea must yield the utmost in flavour, quality is of supreme importance. Ask for . . .

"HOT" TEA

Cereals Have New Role in Wartime

Breakfast Foods Are Plentiful, So Smart Cooks Use Them Twice

(By Barbara B. Brooks)

Women are taking the food situation in their stride. When the grocer announces he has run out of this or that, or the bin in the super-market is empty, they no longer get the desperate what-will-I-have-for-supper look. Cheerfully, they are using the foods that are plentiful—whether they were used them before or not.

Cereals, for instance. They're still on the grocer's shelves. Of course cereals are new. People have been eating them for breakfast for generations. But cereals for lunch and dinner are off the beaten track. Yet today women are buying crisp prepared cereals and using them in cooking with results that are little short of amazing.

As food stretchers, cereals do a fine job. Combined with meat they make a tasty meal like a lot. But cereals do more than stretch. They add flavor, interest and food value.

Sausage And Apple Patties

1½ cups veal waste shreds
½ cup milk
1 egg, slightly beaten
1½ pounds ground raw beef
½ pound pork sausage
1 teaspoon salt
1 teaspoon pepper
2 medium apples
Combine whole meat shreds, milk, egg, let soak until most of moisture is absorbed. Add meat, seasonings and onion; mix together thoroughly. Divide mixture into twelve equal portions and form into balls.

Veal Patties

4 cups corn flakes
1½ pounds veal steak
1 tablespoon water
1 egg, slightly beaten
1½ pounds ground raw beef
½ pound pork sausage
1 teaspoon salt
1 teaspoon pepper
2 medium apples
Combine whole meat shreds, milk, egg, let soak until most of moisture is absorbed. Add meat, seasonings and onion; mix together thoroughly. Divide mixture into twelve equal portions and form into balls.

Save Money

Canadians Have Huge Savings To Ease Post-War Difficulties

R. L. Wright, research director for a Canadian advertising agency, told the Toronto Graphic Arts Association that Canadians now have a savings cushion of more than \$5,000,000,000 to ease the difficulties of the post-war transition period.

He suggested this reserve might be increased at the rate of \$2,000,000,000 a year.

He warned that these savings might lead to a "rigidant post-war economy" and added that it might be necessary to retain wartime controls to maintain equitable distribution of supplies and to avoid inflation.

One hundred pounds of old newspapers can be processed into 200 containers for blood plasma.

Dice are said to have been used in Greece about 1244 B.C.

The Garden Plot

Gardens Supply Vegetables High In Nutritional Value

The kitchen garden planted to supply the family with both fresh vegetables all summer long—and canned, or stored vegetables for winter use plays an important part in keeping Canada strong and healthy. Father doubts his his planting plan is any better than his own. Mother, with her knowledge of food values should make a check to be sure that those vegetables specially high in nutritive values are given their proper share in the garden plot. Nutrition Services at Ottawa rate tomatoes a "must" for every garden. The leafy vegetables, spinach or chard and kale, so rich in vitamin A, should be given priority and the yellows—including squash and corn when the garden is big enough, should be among those present.

This Week's Pattern

R4746

A slanting, feminine frock that's easy as falling off a log to make is Pattern 4746. Note how few pattern pieces. What's more, it buttons down the front so that you can slip into it without spoiling your hair-do. A style to wear at the office, at home, or on the street.

Pattern 4746 comes in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 171 McDermott Ave. E., Winnipeg, Man. (Because of the shortage of the mails delivery of our patterns may take a few days longer than usual.)

LARGEST FOG STOCK

The Daily Mail reported that the largest stock of fog in the world has been accumulated by Britain for the western invasion—food for the invading soldiers, for the people they will liberate and for civilians at home.

Dice are said to have been used in Greece about 1244 B.C.
